PROFILE

Second-year Computer Science student at Simon Fraser University with strong foundations in programming, software development, and problem-solving. Skilled in Python, Java, and web technologies with hands-on experience in projects involving APIs, data structures, and AI integration. Seeking a co-op opportunity to apply technical skills and contribute to innovative software solutions

SKILLS

- Teamwork & Collaboration – proven ability to work effectively in cross-functional teams.
- Strong Communication Skills – clear written and verbal communication with team members and clients.
- Problem-Solving & Critical Thinking – ability to troubleshoot and find creative solutions.
- Adaptability & Flexibility – can adjust quickly to changing priorities and technologies.
- Technical Proficiency – Python, Java, React, Git/GitHub, and API integration.
- Time Management & Organization – able to prioritize tasks and meet deadlines in team settings.
- Conflict Resolution & Feedback – comfortable giving and receiving constructive feedback to improve team outcomes.
- Agile/Scrum Experience – familiar with collaborative project management methodologies.

PROJECTS

FitPalette – Wardrobe Colour Assistant (2025)

- Developed a web app using Node.js and Google Vision API to analyze images and recommend colour palettes.
- Implemented front-end (React) and back-end (Express, MongoDB) with secure user authentication.

RouteRadar Travel Assistant (2025)

- Integrated Uber API to optimize travel routes and provide cost/time estimates.

Personal Portfolio Website (2025)

- Designed and built a fully responsive personal portfolio using React and TailwindCSS.
- Showcases collaborative and individual projects with GitHub and LinkedIn integrations.

WORK EXPERIENCE
